Section 6

NATIONAL RALLY GUIDELINES and ROUTE LAYING

- 6.1. These guidelines were compiled in 1985 based on suggestions from member clubs of SAVVA and updated in 1996 to take into account current practice. The events that carry National Status are:
- SAVVA:-
Edwardian – Veteran National (Name of Sponsor to be included)
Veteran & Vintage National (Name of Sponsor to be included)
Post Vintage & Post War (45) National (Name of Sponsor to be included)
Motorcycle National (Name of Sponsor to be included)
- 6.2. **ROUTES:** A total distance of between 600 and 800 kilometres is suggested as an ideal length of which 400 to 600 kilometres is within regularity sections for vehicles post-vintage and up. Many vintage vehicles are capable of these distances but organizers who wish to attract the older vehicle should consider their limitations when opening events for a large cross section of vehicles. Veteran and vintage events should be much shorter.
- 6.3. **DURATION:** Travelling time, cost implications and distance to get to and from an event should be taken into account when setting dates for an event
- 6.4. **SPEEDS:** Caution must be exercised by organizers to ensure speeds set are realistic for the type and year of vehicle to be attracted to the event. Cognizance should be taken of the figures quoted on the entry form by the entrant. Speeds set for the highest speed group should never be more than 90% of the speed limit set by the traffic authorities for the road being used. Also consider the lack of braking capabilities of older vehicles when setting speeds in built up areas.
- 6.5. **NAVIGATIONAL COMPETITION:** Events organized by SAVVA clubs are always Tours, Trials, Reliability Runs or a plain Run so as not to be seen to be part of the high speed rally scene. The lengths of non-regularity/ decontrolled sections are at the discretion of the organizers. Suggested time for serious rallying depends on the type of vehicle being catered for but should not exceed three to four hours per day. To conform to International Regulations check points / marshals should not be placed within towns. With the inclusion of GPS data loggers and co-ordinates, events may also consider using, as an alternative a Self-Timed Controls. All marshal points must be clear of the road. Daily schedules of departure and arrival times, morning and afternoon, should be included with the Final Instructions or given to entrants at documentation. Organizers to consider whether daily results are given out but it may be a way of circumventing problems on the final day if entrants feel they can query or discuss the results daily with organizers if necessary.
- 6.6. **ROUTE SCHEDULES:** The time that these are handed out for each day is left to the discretion of organizers. Bear in mind that motorcyclists need extra time to prepare the paperwork. Also consider the fairness as strangers to an area have a distinct disadvantage to locals who may know the area well.
- 6.7. **ACCOMMODATION:** This should be provided from the night before the start until the morning after the prize-giving, wherever possible and/or if required.
- 6.8. **CONCOURS:** After initial elimination all finalists to be judged by the same team of judges in all classes. Winners to be determined from the average of all judging sheets, to ensure fairness and uniformity in standards. When the event is promoted, organizers should state whether Concours to be 'Elegance' or 'Condition'. If restricted to 'Elegance' no detailed

- examination of all parts of the vehicle is carried out. At organizers discretion whether to include a Concours is held at the beginning or end of the event.
- 6.9. **SUNDOWN:** Calculations must make provision for all vehicles to be at destination by dusk at the end of the day's run. In addition no vehicles may leave before sunrise on the day of a run.
- 6.10. **PARKING:** Organizers to provide secure parking at all places of group stop over and if possible covered parking at night and/or provide/employ a security service.
- 6.11. **ORGANISING PERMIT:** An Organizing Permit must be obtained from SAVVA Motorsport. Application on the prescribed form (see Section 3) must be made eight weeks prior to the event or the closing date for entries. Organizers must be familiar with the GCRs of MSA and the VSRs of SAVVA printed in booklet form in 1991 and amended September 2025.
- 6.12. **COMPETITION LICENSES:** See Section 4
- 6.13. **PROVINCIAL and LOCAL AUTHORITIES:** Written permission must be obtained from the Provincial Traffic Authority and all Local Authorities, Provincial, Municipal, Village Councils and the SAPS, through whose area of jurisdiction the event will pass. At all times during the event the Chief Marshal and Clerk of the Course should be in possession of copies of all permissions including the SAVVA Permit.
- 6.14. **TROPHIES:** All trophies are the property of SAVVA where the event has National status and category relevant SAVVA Trophies are awarded. Organizers are responsible for obtaining the signatures and addresses of the winners of trophies when presented at the prize giving. The list of holders is to be sent to the SAVVA Trophy Officer as soon after the event as possible together with a list of the results and awards so that these may be recorded in the register.
- 6.14.1. In addition the organizer of the completed National Event shall send the SAVVA delegate for the organizing club of the next National Event a full list of trophies, winners with addresses and telephone numbers and a copy of the results which shall show details of the vehicle (year and make).
- 6.14.2. The trophy officer of the club organizing the next national shall send out letters six months before the event to all trophy holders reminding them to have the trophy engraved and returned by a certain date.
- 6.14.3. It is recommended that the SRs for the event include a clause that winners of trophies are responsible for the return of the engraved trophy in good condition.
- 6.15. **SPONSORED EVENTS:** Within two months of the completion of a National Event a detailed statement of income and expenditure shall be submitted to the SAVVA Chairman, Treasurer and the Sponsor.
- 6.16. **GENERAL:** Organizers shall have in their possession the following publications for guidance and reference purposes:
- General Competition Rules of Motorsport South Africa (2019). Available as a download from the SAVVA website
 - International Code of FIVA (Held by SAVVA Councillors)
 - Standing Supplementary Regulations of SAVVA (Published April 2020)
- 6.16.1. Organizers are urged to stress to competitors the need to obey the rules of the road and speed limits at all times. The consumption of alcohol should be discouraged / prohibited whilst participating in an event during the times allocated to the event each day, and organizers should take cognizance of the need to avoid vehicles being driven by competitors who may ignore this requirement and be over the legal limit. Such action may / will result in the offending participant being disqualified.

6.17 GENERAL ADVISORY ON ROUTE LAYING AND ROUTE SCHEDULES

In the interests of safety, it was resolved at the Annual Meeting of SAVVA in 1999 and reaffirmed in 2000, 2017, 2021, and 2017, that organizers must continually take cognizance of the ever-increasing levels of traffic particularly in the larger metropolitan areas of the country. Added to the general disregard for traffic regulations and the deterioration in many roads it is highly advisable for the following points to be taken into account when routes are being set especially that setting a route is not a competition between the organizers and the competitors.

- 6.17.1 All clues and control signs to be on the left of the road unless specified otherwise in the route schedule. Where possible signs should be within about 15 meters of the road and letters no smaller than 60 millimetres. Bigger objects like windmills and buildings should ideally be no more than 50 meters from the road.
- 6.17.2 If a signboard has to be used the entire wording should be quoted exactly. Try not to pick out a small sign among many as a pointer. The alternative should a large board be used that includes all sorts of advertising it could be shown in the route schedule as "Sign Board for Piet's Place B & B giving names rates and details".
- 6.17.3 Where there is no time or distance alongside a point on the route schedule, the first point on the route that matches will be taken as the correct point (See VSR 20). Extra caution is required when using gates and obscure objects alongside the road that in fact there are not more than one and the organizer selects and identifies the actual point desired.
- 6.17.4 Be careful when giving clues too close together. If possible, avoid clues in a busy road, which is dangerous for a competitor. Endeavour to have a minimum of 100 meters between clues.
- 6.17.5 The Start and Finish of Regularity Sections should be totally clear and if it is necessary for competitors to stop it is essential that sufficient safe off-road parking is available. At the same time sufficient space must be provided for competitors to start without endangering other road users or the competitor whose focus at that point is starting on time.
- 6.17.6 If it is necessary to pass through a built-up area whilst in Regularity allow plenty of time for safe passage, for traffic disruption and any Stops. Also provide a time/point check before the placement of a marshal / GPS co-ordinate point the other side. Also be aware that there may be limitations on overtaking.
- 6.17.7 Be aware of the speed limits along the whole route and ensure that speeds set are not higher than 90% of the legal limit. Further the maximum speed on any event should not exceed 90 kph. Example on a 60 kph limitation max speed cannot exceed 54 kph but a slightly lower speed may be preferable.
- 6.17.8 It is inadvisable to place a control within 200 meters of a point where a competitor has to stop or where there is a possibility of congestion that results in a line of vehicles building up. Further a control should not be placed within a kilometre after such a point. Refer VSR 21.
- 6.17.9 When placing controls, it is not advisable to have these where there is no overtaking or within 500 meters of the end of the barrier line. Placing a control at the top of a hill will also be frowned upon.
- 6.18 **VSRs and SRs:** It is important to be familiar with these. Whilst the above points could, and in the view of many, be incorporated within the Regulations, it is the view of the National Council that over regulation can be detrimental to the organizers and competitors alike. It is therefore incumbent upon organizers to take these recommendations seriously and be aware of potential dangers for competitors and other road users.
- 6.19 **WARNING OF SLOW MOVING VEHICLES:** Organizers are asked to consider measures that they can put in place where slow moving vehicles may create a traffic hazard. See section 17 of the VSRs.

Section 7

 - 7.7.1. The member/applicant completes the form and must supply all relevant supporting information for the date claimed. The onus is fully upon the member/applicant to supply sufficient information to the Club Dating Officer to verify the date claimed. Information from reference books, letters from authorities or marque specialists, must be attached to the application form either in the original form or photocopies thereof.
 - 7.7.2. Club Dating Officer examines the application form to ensure there are no omissions in the answers supplied and that all questions have been answered. If insufficient detail or information is supplied, it is the responsibility of the Club or their Dating Officer to assist the member to locate local or overseas references or consultants.

investigation must be done by the Club Dating Officer in consultation with the owner, who must have the opportunity to accept a revision of date claimed.

- 7.7.4. The SAVVA Dating Officer has the power to reject an application if he feels that insufficient information has been supplied to verify the date claimed. He may institute his own research or return the application to the club concerned for revision.

The details will then be entered in the Master Dating Register and will arrange for the plaque and certificate to be made. He will then despatch the plaque and certificate to the club concerned.
- 7.8. **RE-DATING:** Should a Club Dating Officer or a member obtain proof that the date of the vehicle previously dated, is not correct, it must then be re-dated. There will be no charge for re-dating. The cost of replacement of the plaque and/or certificate will be as per Section 14 herein.
- 7.9. **RE ISSUE OF PLAQUES AND CERTIFICATES:** These may be reissued due to loss, change of ownership or change of date in accordance with the costs set out in Section 14. The SAVVA form must be used when ordering duplicate/replacement plaques and certificates.
- 7.10. **SCOPE OF DATING:** All member clubs of SAVVA have agreed to accept the dating of a vehicle as proof of eligibility in their events. The dating is not a guarantee of authenticity of the vehicle and by the issue of the plaque and certificate SAVVA does not bind itself by the contents engraved or written therein in any way whatsoever.
- 7.11. **DIFFERENT AGE OF COMPONENTS:** When the major components of a vehicle or motorcycle are of a different year of manufacture, then the dating is done as follows:
- Example No. 1.** Chassis and body are 1927, engine is 1929 in order to get the vehicle mobile. The certificated 'date' would be 1927/1929. And for events the vehicle would be entered/classified as a 1929.
- Example No. 2.** A motorcycle frame 1917, engine 1923. Certified 'date' would be 1917/1923. Vehicle would not be able to enter as a Veteran.
- 7.12. **REPLICA, SPECIAL and NON-AUTHENTIC REPRODUCTION BODIES:** When the body of a vehicle...
- a) has been altered or modified to create a body which differs in style or appearance from the original body as fitted at the time of manufacture,
- b) is an exact reproduction or recognised coach work but has been created at a later date than the date of manufacture of the engine, chassis and original body, this vehicle is to be recognised as a non-authentic replica and should be described as either a replica or a special or a non-authentic reproduction in the SAVVA Register, on the Dating Certificate and on the back of the Dating Plaque.
- 7.13. **PROOF OF DATING:** The only acceptable proof that clubs are compelled to acknowledge that a vehicle has been dated by SAVVA is the Official Plaque as illustrated below or the Dating Certificate. There is a tendency by a few clubs to produce their own version of a dating plaque that is not approved.
- 7.14. **COMMUNICATION and QUERIES:** At all times, both the SAVVA Dating Officers will only communicate with Club Dating Officers. Any queries by club members must in be directed to their respective Club Dating Officer who in turn will contact the SAVVA Dating Officer concerned. Section 9

INSURANCE

This section covers all Insurance matters arranged by SAVVA. The first portion is Motor Insurance on member's vehicles and the second is the Public Liability Cover. The appendices follow thereafter.

SAVVA COLLECTOR'S VEHICLE SCHEME

- 9.1. **SAVVA** has in place an insurance scheme with **Cross Country Insurance Consultants CCIC / Puma Insure – based in Cape Town** for the coverage of vehicles that are over 20 years old and which belong to club members. Cover is in accordance with a standard motor comprehensive policy with an endorsement for the SAVVA Collector's Vehicle Scheme which **accommodates** the use of the vehicle and who may drive the vehicle **with limited restrictions** As a result the rates are discounted substantially and are extremely low. Some conditions may be changed to widen the use and cover at additional premiums.
- 9.2. **ARRANGING COVER:** It is in the interests of SAVVA and members to conserve the scheme by not allowing substandard risks to be placed on the scheme. The rates are extremely low compared to what is generally available in the open market. Should clubs be aware of any adverse features of the vehicles owned by a member and the general use of the vehicle these should be brought to the attention of the Insurance Portfolio Holder. Cover can only commence when a fully completed Application and any other documents are in possession of the Company with the required premium paid.
 - 9.2.1 **WAITING PERIOD:** No person would be accepted on the scheme unless they **are a paid up** member of a club – **in good standing** Secretaries should note on the Application the date of joining when issuing the Application to the member.
- 9.3. **AVAILABILITY OF COVER:** Many people, mainly senior citizens and younger people, join the movement in order to secure insurance cover which is not generally available to them, and at substantially lower rates than on offer elsewhere, particularly for the older vehicles. **NB This cover is only available to Club Members in good standing.**
- 9.4. **BENEFITS TO CLUBS and SAVVA:** The scheme is placed directly with – **CCIC / Puma Insure**
- 9.5. **DOCUMENTATION/QUOTATION/APPLICATION:** The SAVVA Collector's Vehicle Policy is only available to paid up members of clubs in good standing.
- 9.5.1 A quotation is available directly from **CCIC / Puma Insure – contact Chris van der Merwe on email chris@pumainsure.co.za**

Further detailed information is available on the SAVVA website.

Section 10

SPONSORSHIP AND COMMUNICATION

- 10.1. GENERAL:** SAVVA works through the Department of Transport in Pretoria regarding the National Transport Information System (NATIS) and legislation on motor vehicles now that a single system is in place.
- 10.2. COMMUNICATION WITH GOVERNMENT:** Clubs are encouraged to refer matters that affect the old vehicle movement as a whole, to SAVVA and not approach government or municipal departments directly. It is essential that we make a common unified stand when approaching the authorities.
- 10.3. SPONSORSHIP:** Organisers of National Events may approach the SAVVA Chairman for sponsorship. Many of the larger sponsors have requested that they will only consider involvement if the SAVVA National Council is involved in the discussions and negotiations. All funds shall be channelled through the SAVVA Treasurer. Promoting Club's attention must be drawn to the following conditions for eligibility for SAVVA sponsorship, only National Events can apply for assistance. SAVVA at all times retains naming rights for the event, all documentation must carry SAVVA branding and all must be pre - approved prior to issuing of permits by SAVVA MS
- 10.4. FINANCIAL REPORTING:** When application is made to SAVVA a full detailed budget must be submitted and include the names of the club members that will be administering the funds and the name of the Financial Institution that will hold the funds. A brief outline of the event will also be required stating the hotels to be used and the towns and places through which the event will pass.
 - 10.4.1.** If the sponsorship is granted the club will be fully responsible for moneys in their possession and will need to account by way of a detailed statement to the SAVVA Treasurer within 30 days of the running of the event. Any money not utilised must be returned to SAVVA.
- 10.5. REPRESENTATION with FIVA:** All communication with FIVA is directed via the SAVVA FIVA Portfolio Holder - The Chairman of SAVVA may represent the Association at the meetings of FIVA or IHVO. In the event that he is unable to travel overseas at the scheduled time of the meeting the SAVVA National Council shall appoint an alternative representative but will take into consideration the necessity of such a trip, together with any possible benefits that may be derived from such – before attendance at any such meetings is approved.

Section 11

FIRE EXTINGUISHERS

- 11.1.** SAVVA recommends that all vehicles carry as a minimum requirement a 1 kilogram dry powder fire extinguisher. For those who feel that 1kg fire extinguisher is inadequate, then the desired size could be made up of multiples of 1kg extinguishers. Most dry powder fire extinguishers now available have a controlled discharge.
- 11.2.** Dry powder extinguishers are proved and efficient. The dry powder chemicals smother the fire and eliminate the danger of re-flashes.
- 11.3.** The BCF (Bromochlorodifluoromethane - CBrClF₂) type of fire extinguisher is no longer recommended as it is not “ozone friendly”. Those who still have BCF fire extinguishers should keep them for an emergency, but discard them after use, and replace them with dry powder extinguishers. Check the recharge date on the BCF unit to ensure that it has not expired to ensure the unit is serviceable if required.
- 11.4** It is recommended that all back up vehicles carry an appropriate first aid box together with an emergency thermal blanket.

Section 12

SAVVA CHAIRMAN'S TROPHY

- 12.1. ELIGIBILITY:** The person who is considered to have done most for the “Veteran and Vintage” movement during the year under review. This effort may have been directed in general or to his/her own particular club. He/she must be a member in their own right in good standing of their club, which must be affiliated to the SAVVA.
- 12.2. PROCEDURE:** Each year, at least six weeks before the Annual General Meeting of SAVVA, each club wishing to do so, submits a summary of the work done by the member whom the club nominates. This should be an outline describing just why the club considers the nominee to warrant the premier award of the year. The prerogative lies with the SAVVA Chairman to decide to whom the award will be made and should he not receive any nominations has the power to award to a person of his choosing. He then obtains a miniature. The club at a suitable function should present both the trophy and the miniature, as soon as possible after the SAVVA Annual General Meeting.

Section 13

SAVVA SUBSCRIPTIONS

- 13.1. SAVVA SUBSCRIPTIONS:** These are due on the first day of January each year based on the membership of each club as at December 31st of the previous year. The amount due is stated in Section 14 of this handbook and can be revised from time to time.
- 13.1.1 NO SUPPLEMENTARY** payments are required for new members joining during the course of a year, as this will be taken care of at the beginning of the next year.
- 13.1.2.** In terms of the SAVVA Constitution (Section 2 herein), subscriptions must be paid before the 31st of January, failing which a club in default shall be automatically suspended from all benefits of membership, including voting rights. The onus is on the Club Treasurers to ensure that SAVVA dues are paid by the due date. NO DEBIT NOTE WILL BE SENT OUT BY THE SAVVA TREASURER FOR THE PAYMENT OF DUES. A confirming invoice will be sent if requested - when the payment is received.

- 13.2** Clubs should maintain an accurate record of their membership to be available to SAVVA when required. Clubs must supply the SAVVA Secretary, for record purposes, on an annual basis, a full membership list incorporating the indemnity card numbers.

Section 14

INTRODUCTION

The revision of the SAVVA VSRs has become necessary due to a number of changes that have evolved in both the regulatory and procedural conditions pertaining to SAVVA events and also due to previous regulations that have become redundant and which have fallen into disuse.

In the revision contained herein, an attempt is made to include only VSRs currently in operation and use and to update these to conform to the present constitutional and regulatory circumstances.

This revised document will be available in printed format but will also be posted on the SAVVA Website in Electronic form.

The driver/rider/ entrant/owner of the vehicle must certify that he/she accepts the responsibility for the roadworthiness as well as the correct and valid licensing of the particular vehicle in question. For this purpose, the "Pre-event Scrutiny" form [Annexure G] and "Declaration by Driver/Rider" [Annexure F] must accompany the entry forms provided and the completed and signed versions handed to the scrutinising official at pre-event scrutiny. Failure to do so must deny entry and participation on the event.

- (h) Clues and control signs must be clearly visible to the driver of the competing vehicle while travelling in the correct direction. Should signs and/or notices be used as clues, and neither a distance nor expected time of arrival (ETA) is given, all information thereon must be given in full in the route schedule.
- (i) Where an instruction in the route schedule gives a geographical point at which the instruction must be carried out, and neither a distance nor expected time of arrival (ETA) is given, the first geographical point of that type will be considered the correct one.
- (j) Where an instruction contained in the instructions on a route schedule has been “removed” for whatever reason, the accepted and introduced control sign [see VSR 25] must be set up in that position prior to the commencement of the event on that section of the route.
- (k) All distances given in the route schedule shall be in kilometres (km) to two decimal places, and must be as accurate as possible.
- (l) All speeds given in the route schedule shall be in kilometres per hour (km/h).

 - (d) Competitors are warned that making up of lost time, or the required masking of instruments, will not be accepted as an excuse for driving in a manner or at a speed, detrimental to the safety or inconvenience of other road users. Infringement of this rule will result in exclusion. [See VSR 33 (a) (i) and (viii) and VSR 18.]
 - (e) Any competitor receiving a signal from another competitor or motorist who wishes to overtake shall immediately, or as soon as road conditions permit, afford the overtaking vehicle the opportunity to pass. [See VSR 33 (b) (ii).]

24. METHODS OF SETTING SPEEDS

- (a) Speeds will be set by one of three methods, which will be specified in the SRs for the event.

Method 1: Competitors will be placed and registered in a speed group of their choice selected from the options given them in the SRs and on the Entry Form. Set speeds will vary throughout the event, but the speed selected for any particular group, will be the maximum speed which may be set for that group.

Method 2: Competitors will be placed and registered in a speed group of their choice selected from the options given them in the SRs and on the Entry Form. The chosen speed group will be the speed the competitor will maintain throughout the regularity sections of the event.

Method 3: Other methods of setting speeds may be used, but shall be clearly defined and explained in the SRs for the event.

- (b) The organisers shall not set the speeds, or accept nominated speeds, or time allowances which, when converted to speeds, exceeds a speed which is ten per cent below any mandatory speed limits in force.

- (c) The organisers will not be responsible for any temporary speed restrictions on the route, and the onus rests with the competitor to comply with any such restrictions. [See VSR 33 (a)(i) and (viii).]

25. CONTROL SIGNS

- (d) At a control point, the sign shall be placed close to the road, and at 90 degrees to the direction of travel of the competitors. It must be clearly visible to drivers of competing vehicles approaching from the correct direction.
- (e) Attention is drawn to VSRs 21.

26. CONTROLS

A control is a point on the route which will determine the competitor’s progress during the event. [See VSR 25.]

- (a) Types of control
- (i) Open control – a control, clearly identified with a control sign, and indicated as such on the route schedule, at which competitors are required to stop. A time will only be recorded by the Control Officer when the vehicle has stopped with the driver or rider opposite the control sign. [See VSR 28 (e) (iii).]
- (ii) Data Loggers Open control – a control, clearly identified with a control sign, and indicated as such on the route schedule, at which competitors are required to stop. A time will only be recorded by the Control Officer when the vehicle has stopped with the driver or rider opposite the control sign. [See VSR 28 (e) (iii).] This will be an untimed control also known as “Final Open Control “
- (iii) Secret control – a control, identified to competitors by means of a control sign, but not usually indicated on the route schedule, at which competitors may or may not be required to stop to have their time of arrival recorded. Secret controls will be operated by one of three methods. The method to be used must be indicated in the SRs for the event.
- Method 1: The competitor’s time of passing is recorded by the Control Officer without the competitor being required to stop. The time will be recorded when the driver or rider of the competing vehicle is opposite the control sign.
- Method 2: The competitor’s time of arrival is recorded by the Control Officer when he/she stops at the control sign. The competitor is not deemed to be in the control until the driver or rider is opposite the control sign and the vehicle is stationary. [See VSR 28 (e) (iii).]
- Method 3: The competitor records, on a control card, his/her own time of passing a control sign which complies with the requirements of VSR 25 or a geographical clue which complies with the requirements of VSR 21. Organisers must instruct competitors to record times either in SA

Standard Time or Rally Time (i.e. elapsed time). Control cards will be issued with route schedules and secret checks will be carried out to ensure the correct times are recorded by competitors.[See VSR 28 (f).]

Generally referred to as “Self Timed Controls” or STCs

- (iv) Hidden control – a control, not identified to competitors either in the route schedule or by a control sign, at which the Control Officer records the time of the competitor’s passing without him/her stopping
 - (v) Other controls – other types of control may be used but their method of operation shall be clearly defined in the SRs for the particular event.
 - (vi) Virtual Control – an unmanned control, not necessarily identified to competitors on the route schedule, the position of which is predetermined by GPS co-ordinates [latitude and longitude]. The competitors time of passing the control will be recorded by means of a GPS Data Logger carried in or upon the competing vehicle for the duration of the event.
-
- (b) The competitor’s time of arrival at, or passing a control will be recorded in hours, minutes and seconds.
 - (c) If a competitor has more than one time of arrival at a control, only the earlier time will be scored, provided that the control was considered “open” for that competitor. [See VSR 28 (c).]
 - (d) Waiting time will be allowed but only as decided and recorded by the Control Official. Waiting time is defined as “the time spent halted at a control behind other competitors and awaiting the attention of the Control Official”. [See VSR33 (b) (v).]
 - (e) Every entrant, rider, driver, co-driver and navigator in an event has the right, on request, to see any written or printed matter, records, time cards, etc. pertaining to the event, after provisional results have been announced.
 - (f) No competitor may stop, weave or make a U-turn, nor and motorcyclist put his/her feet on the road, in order to lose time within sight of, and before reaching, a secret control. No competitor may cause an obstruction at any control. [See VSR 28 (e) (iv).]
 - (g) A time will only be recorded when a competing vehicle approaches a control from the correct direction.
 - (h) A competitor will be penalised for reversing into a control. [See VSR 28 (e) (v).]
 - (i) All controls will be scored excepting only:
 - (i) when a control is misplaced and its correct position is material to the scoring; or
 - (ii) when the organiser’s clock, if used, develops a fault affecting its accuracy, or the print- out cannot be accurately interpreted; or
 - (iii) if the Control Official/s have failed to record the time of passage of all competing vehicles which fulfilled the requirements of the control; or
 - (iv) if no control sign, where applicable, was displayed for each competing vehicle; or
 - (v) if a control is placed immediately following a section of the route where traffic regulations were enforced during the event, and which operated to the detriment of some competitors and not others. Such a

control may be cancelled at the discretion of the Clerk of the Course, with the consent of the Stewards.

- (j) The organisers shall, at the announcement of the provisional results, advise competitors of the controls which have not been scored and the reasons for their cancellation.

27. WATCHES

All official watches shall be set to “Organisers Time”, also referred to as Atomic Time, and a master clock showing this time will be displayed at the Competitor’s Meeting and at the start of every event, each day

28. SCORING

- (a) Scores will be expressed as a total time error in seconds, each second representing one penalty point, with a maximum of 600 penalty points at any control. Errors will be calculated as the absolute of the difference, in seconds between the Expected Time of Arrival (ETA) and the Actual Time of Arrival (ATA) at a control. The winner will be the competitor who incurs the lowest number of penalty points when totalled over all the scored controls.
- (b) Controls will be scored as follows:
 - (i) at all open controls, one penalty point for every second earlier or later than the official calculated ETA, with a maximum of six hundred (600) penalty points, or six hundred (600) penalty points if more than ten (10) minutes earlier than the official calculated ETA;
and
 - (ii) at all secret and hidden controls, one penalty point for every second earlier or later than the official calculated ETA with a maximum of six hundred (600) penalty points.
 - (iii) At all other controls, as allowed for in VSR 26 (iv), the method of scoring shall be clearly defined in the SRs for the particular event.
 - (iv) virtual controls, one penalty point for every second earlier or later than the official calculated ETA with a maximum of six hundred (600) penalty points
- (c) All controls will be considered open ten (10) minutes before the ETA of each vehicle and will be considered closed ten (10) minutes after each vehicle’s ETA.
- (d) Any competitor receiving maximum penalty points at two thirds of the controls scored or not arriving at the final open control and handing in his score card, if any, within ten (10) minutes of his ETA will be considered a non-finisher for purposes of the official results of the Regularity part of the event. The Clerk of the Course may at his/her sole discretion, present finishers awards to competitors who complete the entire course in compliance with the regulations for the Reliability part of the event.
 - (i) Virtual controls – Any competitor receiving maximum penalty points at two thirds of the controls scored or not arriving at the open control, at the end of each day, and handing his GPS Data Logger to the Chief scorer within thirty (30) minutes of his ETA will be ‘considered a non - finisher for purposes of the official results of the regularity part of the event.

The Clerk of the Course may at his/her sole discretion, present finishers awards to competitors who complete the entire course in compliance with the regulations for the reliability part of the event.

- (f) Where method 3 of operating secret controls is used, any variation in the excess of ten (10) seconds between the organisers' recorded time and the competitor's, will result in the organisers' time being used for scoring and an additional sixty (60) points will be imposed.
[See VSR 26 (a) (ii).]
- (g) No allowance will be made for errors or penalties incurred due to obstruction or force majeure.
- (h) Ties will be decided in favour of the competitor after subtracting their penalties at the last control. If this fails to resolve the tie, their penalties at the preceding control will be subtracted. This procedure will be repeated until the tie is resolved.

This score sheet will be date and time stamped and the competitor will then have thirty (30) minutes to query his results. Thereafter the results will become final. After all competitors have received their score sheets and there are no outstanding queries, overall provisional results will be posted as Per SR 17.
